It is also common knowledge these days that young children are ideal language learners. Students between the ages of 3-7 are also unique language learners requiring a very different approach to older children or adults. This uniqueness, while it has its own challenges, is what makes teaching language to young children so rewarding and effective. So let's talk about <i>Moomin Language School!</i> Designed by a professional team of linguists, language teachers, early childhood educators and experts of state-of-the-art technology, <i>Moomin Language School</i> is a digital language learning service for children aged 3-7 which can be easily and cost effectively adopted by any early learning organization.
15.30 – 15.55 Professional Presentation	<b>SPEAKING FOR YOUNG LEARNERS</b> <i>Katherine Reilly, Author, Teacher Trainer, EXPRESS PUBLISHING</i> Teaching young learners how to speak is no easy task. It's actually one of the greatest challenges both students and teachers must face together. Finding the courage to speak in front of the other students, while also using the correct pronunciation is in itself a huge undertaking. When will the student be able to start a conversation in class while also feeling confident in doing so? Techniques concerning external stimuli, as well as practical methods of influencing a young learner's mind to develop his thought into verbal communication will be presented and assessed, leading to confident and fluent speakers of the language.

In this workshop I'll share some of my favorite activities for motivating students and making idioms easier to remember.
